iPECS-LIK

Simply Unifying
for SME
Communications

As your workforce becomes more mobile and dependant on ease of use and collaboration, your SME communications solution should be simple, powerful and cost effective. For a business to perform and stay competitive, regardless of size, it needs tools that work well together to facilitate fast, well informed, critical decision making in a more efficient work environment.

PRODUCTIVITY ENHANCEMENT OF YOUR BUSINESS WITH UNIFIED COMMUNICATIONS

As an SME, you need to constantly improve business productivity. Ericsson-LG Enterprise iPECS-LIK is the core platform of a Unified Communications Solution with easy to use communication and collaboration tools.

iPECS-LIK brings together various applications and communication tools so you can easily work and serve your customers effectively.

The iPECS UCS Client is an intuitive desktop and mobile application designed for SME users so they can easily collaborate with colleagues. Wherever you are, you are able to reach the resources needed for efficient communications. With the click of your mouse, iPECS UCS Client instantly accesses shared resources such as a central company directory and schedule synchronization. Use the presence information reduce communication latency and communicate with others in the most appropriate format, Instant Message, Voice call, video conference, SMS and more. Share applications and files to review the latest information such as sales

records and improve decision making and response time.

iPECS UCS simplifies your business communications and improves productivity by linking voice and other communications aware applications under a single intuitive user interface.

LOWER TCO AND COMMUNICATION EXPENSES

Ericsson-LG Enterprise has been focusing on small and medium-sized businesses for more than 40 years and this experience is reflected in our products and solutions. The best of which, is the iPECS-LIK for SME, to help you save money and lower costs. iPECS-LIK employs a fully distributed modular architecture to deliver all the advantages of VoIP. The single voice/data infrastructure significantly reduces the costs of managing your communication solution. The modular type gateways, terminals and soft clients can be located anywhere there is access to your network. Powerful redundancy capabilities assure operation should failure occur utilizing back-up power and Call Server modules.

iPECS intelligent management permits a highly versatile interface to save management time and costs of all

iPECS solutions in a distributed environment. Multi-party audio and video conference through the system eliminates the need for expensive, third party conferencing services.

EASY TO USE AND MANAGE

Whether you're adding a new employee, moving phones, dispatching a road warrior or deploying a new branch office, iPECS-LIK always makes it simple to do.

With a simple, straight-forward configuration along with plug and play installation, IT managers appreciate the ability to locate where iPECS solutions are needed without clumsy and difficult configuration limits. Managers can monitor and manage up to 500 Call Servers from a single remote point and have full access to the database and maintenance features of each system from anywhere.

Thanks to the modular hardware and software structure, you can simply add another module to increase the capacity or coverage of service, no matter how your business is growing.
